1. FINANCIAL AND OPERATING HIGHLIGHTS 1.A. FINANCIAL HIGHLIGHTS

Revenue in 2024/Q2 increased by 83% yearly and 13% quarterly. Increase was driven by:

- Significant increase in New Work Bookings and Backlog.
- Contract value appreciation in FX contracts, unit amount and price increase in current backlog.
- Weight increase in revenue recognition from recent projects.

EBITDA in 2024/Q2 increased by 55% yearly and 30% quarterly. Increase was due to:

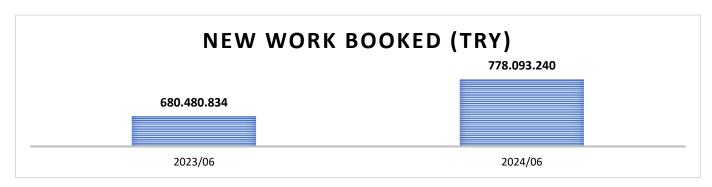

- Increase in revenue.
- More than expected revenue recognition on particular recently signed projects priced with more actual figures and/or have escalation rights in contracts and/or have less labor weight within cost structure.
- Discounted material purchases with favorable commodity prices create extra margin for particular projects.

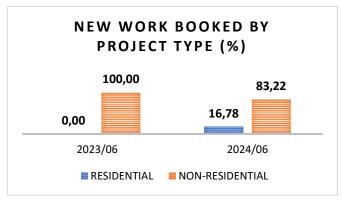

Net Profit in 2024/Q2 increased by 116% yearly and decreased by 31% quarterly. Factors effect Net Profit most and explain difference with EBITDA change are:

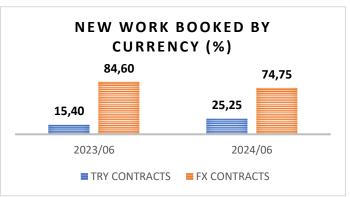

- Net monetary losses arising from the application of inflationary accounting.
- No real estate valuation: No investment activity gains. Plus partial loss from real estate sale.
- Increase in net financial losses due to TRY currency depreciation and interest expenses.

2. MANAGEMENT COMMENTARY ON THE RESULTS

ORGE completed 2024/1H putting great effort into meeting our sustainable growth and profitability commitments. Sticking to the strategy to increase market share in our focal sub-sectors. We received 1 new subway contract (after the end of period) and +2 additions in our current contracts. We signed/received 2 premium residence-tourism projects. Our first oil&gas contract received from TANAP is also signed. We hope it will lead us through new geographies with new partners abroad. Within the period we also received (and signed after the end of period) an airline hangar project that can bring us new opportunities in aviation sector. During the period, we continued our works in first investment project on production of EV chargers. We're pushing hard and thrilled to give a start to production in this year. One of the key developments of 1ST half-year was a MOU signing with an EV routing, payment and marketplace leading company: LIXHIUM for a strategic investment, that can bring synergies to ORGE in EV eco-system.

One of the key elements of current year in financial environment is the initial application of inflationary accounting (TAS 29). Within this regard, Since ORGE has limited non-monetary assets in return for its non-monetary resources (equity), and non-monetary assets have already been valued; therefore, a net monetary position loss occurred as a result of the indexation of shareholders' equity originating from previous years' profits and net period profits. Due to these losses, net profit for the period was limited and the decrease in net profit margin was significant.

Even inflationary accounting our operations in consideration;

Our revenues keep up their growth pace thanks to new works booked and value growth in older backlog, progress increase in particular recent projects.

We managed to increase EBITDA margin having the benefits of our FX contract base and project selection adapted to inflationist environment and optimizing procurement timing and tender pricing taking into account trends in commodity prices.

Experiencing net monetary loss derived by inflationary accounting, having a net loss since there was no investment property valuation and a minor loss

from a partial sale, and also an increase in net financial losses we maintained our bottom line in positive zone with a yearly decrease with lower margin.

On the other hand; according to the results, that inflation accounting has not been applied, since than have not been independently audited; our company seems to have managed to reach the best levels in its history in revenue, EBITDA and net profit figures and also in operating and profitability margins.

Our base scenario for 2024 and beyond is: normalization in governance and economic activity, liquidity, indicators and prices; and their convergence to the expectations of the company.

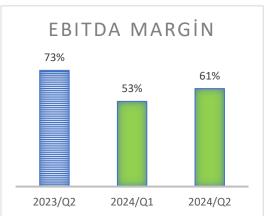

When our base scenario holds; we believe the activities and financial status of the company will not be effected from the downturns and we can deliver 50% revenue growth and 50% increase in operational profit for current year.

3.A. KEY FINANCIAL RATIOS

3.B. MANAGEMENT EXPLANATION ON THE VARIATIONS

EBITDA margin in 2024/Q2 decreased by 12 pp yearly and increased by 8 pp quarterly mainly due to:

- Additional gross margin maintained by contract value appreciation in FX contracts, unit amount and price increases.
- Additional margin maintained by favorable material purchases.
- Huge margin increase maintained thanks to increase in low-labor&low-delay projects in the backlog beating increase in minimum wage and/or severance provisions.
- Increase in general administrative expenses for the projects and for the company is limited, in some cases decreased: due to increase in backlog and/or standalone project sizes.

Net Profit margin in 2024/Q2 increased by 1 pp yearly and decreased by 7 pp quarterly mainly due to:

- Net monetary losses arising from the application of inflationary accounting.
- No investment activity income by investment property valuation plus net loss from a partial real estate sale.
- Net financial loss due to interest expenses and currency loss.
